VisualTail Studio Privacy Policy

Effective Date: October 14, 2026
Last Updated: October 14, 2026

1. Introduction

VisualTail Studio ("VisualTail Studio," "we," "our," or "us") is committed to protecting the privacy, security, and ownership of our customers.

We develop physical products, software, operating systems, and related services with an emphasis on independence, security, transparency, and long-term customer trust.

This Privacy Policy explains how information may be collected, used, stored, and shared when you visit our website, contact us, purchase our products, or use our software and services.

Our goal is to collect only the information necessary to provide our products and services, maintain security, and communicate with our customers.

2. Scope

This policy applies to VisualTail Studio's official website, communications, products, software, and services, including the following product families:

- AirCell
- NeTouch
- NeoLost
- NRing
- Neo Magnet
- Neo Studio
- HermesRouter
- MarsPrinter
- NovaShift
- NovaPad

It also applies to relevant software and services developed by VisualTail Studio, including NeoOS and applicable website-based demonstrations and services.

Individual products may have additional privacy disclosures where their functionality requires them.

3. Information We Collect

The information we collect depends on how you interact with VisualTail Studio.

3.1 Information You Provide

When you contact us, request assistance, submit feedback, inquire about a product, or otherwise communicate with us, we may receive information you voluntarily provide, such as your name, email address, message contents, and relevant support information.

3.2 Purchase and Transaction Information

When you purchase a physical product or service, we may process information necessary to fulfill the transaction, such as order details, shipping information, and transaction records.

Payment details may be handled by a third-party payment processor where applicable.

3.3 Technical Information

Certain software and connected products may require technical information to operate, communicate, diagnose errors, or maintain security.

Depending on the product and its implemented functionality, this may include device configuration, software versions, error reports, connection information, or other operational data.

We do not represent that every VisualTail Studio product collects these categories of information. Collection depends on the product's actual design and functionality.

3.4 Website Information

When you visit our website, certain technical information may be processed by the website infrastructure or its service providers to deliver pages, maintain security, and diagnose technical problems.

Any additional analytics, cookies, or tracking technologies used on the website will be subject to the functionality actually implemented.

4. How We Use Information

VisualTail Studio may use information for the following purposes:

- To fulfill orders and deliver physical products.
- To respond to customer questions and provide technical support.
- To operate and maintain our website, software, and services.
- To identify and resolve technical issues.
- To maintain the security and integrity of our products and systems.
- To communicate important product, service, or security information.
- To meet legal obligations and protect against fraud or unauthorized activity.

We aim to keep information collection and use proportionate to the purpose for which the information is needed.

5. Data Collection and Device Privacy

VisualTail Studio recognizes that privacy is especially important for personal devices, wearables, networking equipment, and locally operated software.

Where applicable to a product's implemented design, our privacy approach is to minimize unnecessary data collection and avoid collecting information that is not required for the product's intended functionality.

The exact information processed by AirCell, NeTouch, NeoLost, NRing, Neo Magnet, HermesRouter, MarsPrinter, NovaShift, NovaPad, Neo Studio, and NeoOS may differ according to their capabilities.

This policy does not claim that every product operates offline, stores all information locally, or operates without telemetry. Such characteristics must be determined by the specific product and its actual implementation.

Product-specific documentation will take precedence in explaining the technical details of a particular feature, subject to applicable law.

6. Data Sharing and Disclosure

VisualTail Studio does not sell personal information as a business practice.

We may disclose information when reasonably necessary to:

- Deliver orders or provide services through relevant service providers.
- Process payments through payment providers.
- Maintain website infrastructure or essential technical services.
- Respond to valid legal obligations or lawful requests.
- Protect customers, our company, and our systems from fraud, abuse, or security threats.
- Complete a corporate transaction where legally permitted.

We seek to limit disclosures to information reasonably necessary for the relevant purpose.

We do not authorize service providers to use personal information entrusted to them by VisualTail Studio for unrelated purposes where contractual or legal restrictions apply.

7. Product Ownership and Digital Content

VisualTail Studio believes that customers should understand what they own when they make a purchase.

Our physical products are intended to be purchased as products, rather than treated as digital items that customers merely license. Our company philosophy emphasizes physical ownership and the principle that customers should own what they buy.

This ownership philosophy does not eliminate the need to protect personal information processed when fulfilling orders, providing support, or operating applicable services.

Any separate software terms, intellectual property rights, or applicable legal restrictions remain governed by their respective terms.

8. Data Storage and Security

We take reasonable measures appropriate to our operations to protect information against unauthorized access, disclosure, alteration, and destruction.

Depending on the relevant service, information may be processed on a device, on systems operated by VisualTail Studio, or by a third-party service provider.

We aim to prioritize security during product development and service operation. However, no electronic system can be guaranteed completely secure.

Specific security features and storage arrangements may differ between products.

9. Data Retention and Deletion

We aim to retain personal information only for as long as necessary for its intended purpose, including order fulfillment, customer support, security, recordkeeping, and legal compliance.

When information is no longer required, we may delete it, anonymize it, or otherwise dispose of it where reasonably practicable.

Where a product provides local storage or user-controlled deletion, the available controls and their limitations will depend on that product's implementation.

10. Cookies and Website Technologies

VisualTail Studio's website may process information necessary to deliver website functionality and maintain security.

Cookies or similar technologies may be used where implemented for purposes such as maintaining preferences or analyzing website usage.

This policy does not imply that advertising cookies, third-party analytics, or behavioral tracking are present. Their use depends on the website's actual configuration.

11. Third-Party Services

Certain functions, including website hosting, payment processing, shipping, and communications, may rely on third-party providers.

Those providers may process information according to their own privacy policies and applicable contractual obligations.

VisualTail Studio is not responsible for the independent privacy practices of third parties, but we aim to use relevant providers appropriately and limit unnecessary disclosures.

12. Children's Privacy

VisualTail Studio does not knowingly collect personal information from children in violation of applicable law.

Where applicable law requires parental consent or additional protections for children's information, we will follow the requirements that apply to the relevant service.

If you believe personal information has been collected inappropriately, you may contact us using the details provided below.

13. Your Privacy Rights

Depending on your location and applicable law, you may have the right to:

- Request access to personal information we maintain about you.
- Request correction of inaccurate information.
- Request deletion of eligible personal information.
- Obtain a copy of certain personal information.
- Opt out of certain processing activities where applicable.
- Withdraw consent where processing is based on consent.
- Appeal a privacy decision where required by law.

To exercise an applicable right, contact VisualTail Studio through its official contact channel.

We may request reasonable information to verify your identity and will respond within the time required by applicable law.

14. International Data Processing

Some service providers may process or store information in countries other than the country where you reside.

Where applicable law requires additional safeguards for international transfers, we will take the required steps.

15. Changes to This Policy

VisualTail Studio may update this Privacy Policy as our products, services, and operations develop.

The latest version will include an updated revision date. Where required by law, we will provide additional notice or obtain consent for material changes.

16. Contact

For privacy questions, requests, or concerns, contact VisualTail Studio through the official Contact page on our website.
